

On 10<sup>th</sup> February, 2018 the department of Chemical Engineering had organized a rural campaigning covering a major areas of the village of Rajbandh college para, along the DVC canal, eastern side of the railway cabin. The primary objective of the department as well as the students was to get closer to the residents and to get an idea of the present needs and necessity. The people out there were very cooperative to the organizers and without their participation; the aim could not have been fully achieved. The students were guided by the Head of the Department along with a faculty member of the department. The students found it very important as well as interesting to be a part of the campaigning. The residents were asked about their present needs, necessity and any suggestions from their part were highly appreciated and noted down. The students visited several families at the place and the head of the family was been enquired so as to get a detailed information regarding all the family members. The

students had divided themselves into few groups in accomplish the task efficiently and reach the maximum number of people. The department had also arranged for chocolate to be distributed to each of the families as a token of love and in order to celebrate the achievement. The residents in return joined hands with the department in completely fulfilling the aim. A detailed survey was conducted and at the end of the day the major issues were being sorted and solutions was being sought after. The department had taken several initiative to solve the existing problems and a few are yet to be

implemented. The entire work was highly appreciated by others and more of such type of campaigning is being highly expected in future. The department had also planned to

organize this type of rural campaigning at different places at different point of time. The activities of such types are quite necessary keeping in view the interaction with people of various places and knowing them in a broader sense in order to be a good human being along with being an engineer.
