The minutes of IQAC meeting and compliances to the decisions have been uploaded on the institutional website			es to the nal	Yes			
I	Upload the minutes of meeting and action taken report			View Uploaded File			
1 ti	11. Whether IQAC received funding from any of the funding agency to support its activities during the year?						

12. Significant contributions made by IQAC during the current year(maximum five bullets)

IQAC regularly monitors the ongoing academic activities and time to time suggest and incorporate developmental strategies.

Promotes industry academia relationships which facilitate a good number of students for their better exposer.

Organise periodically short seminar and hands-on workshops.

Motivates faculty members to participate on FDP, research activity and training programme.

Monitors the examination system and incorporate corrective measures to enhance the quality of the modus operandi.

View Uploaded File

13. Plan of action chalked out by the IQAC in the beginning of the academic year towards Quality Enhancement and outcome achieved by the end of the academic year

Plan of Action	Achivements/Outcomes
Regular review meeting with HODs for academic activities and class report	Gradual improvements are observed regarding the class discipline and academic quality.
Regular monitoring of class attendance	The attendance was improved which reflects in the final result of the students.
Implementation of Monthly Assessment Test (MAT)	MAT in regular interval improves the skill and understanding of the students in the micro level. In addition, this helps the students to built-up their confidence.
Analysis of results	The results are analyses by the academic committee, students are grouped category-wise and special attention will be given to the weaker group. This helps to uplift the grade of the slow learners.
Emphasis on Laboratory Classes	Students are also assigned additional lab classes apart from the regular with some extra task and related but out of syllabus problems to solve. This helps to enhance their intellect and also helps to build up their confidence level and deductive power to handle sudden and unfamiliar technical issues.

 14. Whether AQAR was placed before statutory body ?
 Yes

 Name of Statutory Body
 Meeting Date

 Managing Committee
 06-Mar-2020

 15. Whether NAAC/or any other accredited body(s) visited IQAC or interacted with it to assess the functioning ?
 No

 16. Whether institutional data submitted to AISHE:
 Yes

Year of Submission	2020
Date of Submission	31-Dec-2020
17. Does the Institution have Management Information System ?	Yes
If yes, give a brief descripiton and a list of modules currently operational (maximum 500 words)	We only have a partial management information system which mainly deals with the daily attendance, leave management and housekeeping. We have a plan to incorporate the student data and academic records within the system. At present all the faculty and staff members are using the facilities for their daily attendance, schedule of leave which they can see the approval within the stipulated time from higher authority. They can also check their leave balance through this system. In addition, planning to incorporate the Store and material issue within the same system has already been discussed.

Part B

CRITERION I – CURRICULAR ASPECTS

1.1 – Curriculum Planning and Implementation

1.1.1 – Institution has the mechanism for well planned curriculum delivery and documentation. Explain in 500 words

As we are approved by AICTE and affiliated to MAKAUT, we follow the basic guidelines of university. Besides that, we also maintain an academic calendar of our own with a proposed schedule of inhouse academic and administrative activities. A regular meeting related to the class conduction and academic enhancement has been performed with head of the departments every week. Planning has been done to monitor the classes in regular manner to enhance the attendance and has been successfully implemented. This remarkably improved the attentiveness of the students in our Institution. Planning also has been done to restrict the change of the class routine in between a semester and to follow the published time table as strictly as possible. This helped a lot to maintain the discipline of the total student and teacher fraternity. The remedial classes are additionally incorporated at the middle of the semester for the slow learners. We have arranged some special classes also for the doubt clearing and revision. Teachers prepares and submit the lecture plans at the beginning of every semester. Class lectures are followed accordingly which helps the students also to track the development. Regular feedback of the students has been taken and analysed to find their difficulties and addressed accordingly. Mentorship system is incorporated at the beginning of every semester and run throughout the year. Students are very happy and highly benefited through the mentorship process.

1.1.2 – Certificate/ Diploma Courses introduced during the academic year

1.4 – Feedback System							
1.4.1 – Whether structured feedback re	eceived from all the stakeholders.						
Students		Yes					
Teachers		Yes					
Employers		No					
Alumni		Yes					
Parents		Yes					
1.4.2 – How the feedback obtained is to (maximum 500 words)	peing analyzed and utilized for overall	development of the institution?					
Feedback Obtained							

Student satisfaction feedback serves as a critical cornerstone in the continuous growth and refinement of educational institutions, contributing to their holistic development. This feedback is garnered through a meticulous process, encompassing a spectrum of parameters that are pivotal to the student experience. These parameters, which include the completion of the syllabus, the depth of course content, classroom communication, clarity in the evaluation process, learning value encompassing knowledge, skills, and concepts, industry relevance of the course, and the overall quality of education, provide a comprehensive framework for assessment. Once the feedback is obtained, it undergoes a systematic analysis that serves as the bedrock for informed decision-making. The analysis encompasses both qualitative and quantitative approaches, wherein qualitative comments are scrutinized for nuanced insights, and quantitative data is processed to identify trends and patterns. The feedback is then meticulously dissected across each parameter, allowing institutions to identify areas of strength and excellence as well as areas that necessitate refinement. Utilizing this feedback as a catalyst for institutional development is a multi-pronged endeavour. Positive feedback acts as an affirmation of effective strategies, encouraging faculty members to continue their commendable practices. Conversely, constructive feedback in areas such as completion of the syllabus or classroom communication prompts targeted action. For instance, if feedback underscores a gap in the completion of the syllabus, institutions may reevaluate pacing and allocate additional resources to ensure comprehensive coverage. Similarly, if the depth of course content or the clarity of the evaluation process is flagged, faculty development initiatives can be designed to enhance pedagogical techniques and assessment methodologies. Moreover, the feedback extends its reach beyond the immediate classroom environment. Insights regarding learning value, industry relevance, and the overall quality of education guide curricular reforms. If feedback highlights a misalignment between learning outcomes and industry demands, institutions can collaborate with industry partners to bridge the gap, ensuring graduates possess the necessary skills and knowledge for career success. Furthermore, the feedback loop encourages interdisciplinary collaboration, enabling departments to leverage each others strengths to enrich the learning experience. Institutional development driven by student feedback is a cyclical process that thrives on continuous improvement. To ensure that the feedback translates into tangible action, institutions often establish dedicated committees or task forces. These groups, comprising representatives from various academic and administrative domains, work collaboratively to formulate and implement strategic initiatives. Regular follow-ups on the progress made in response to feedback ensure that the loop is closed, thus nurturing a culture of responsiveness and adaptability. In conclusion, the process of obtaining, analysing, and utilizing student satisfaction feedback is a cornerstone in the evolution of educational institutions. With parameters ranging from curriculum completion to the overall quality of education, this feedback holistically informs decision-making and fuels targeted improvements. By embracing student voices, institutions not only enhance the educational experience but also foster a culture of continuous development, ensuring their relevance and excellence in an ever-evolving landscape.

CRITERION II – TEACHING- LEARNING AND EVALUATION

2.3.2 – Students me	entori	ng system ava	ailable in	the institut	ion? Give d	etails. (maximum 500 \	vorc	ls)	
The mentor-mentee practice is a fundamental aspect of our institution, representing a dynamic relationship that fosters personal, academic, and professional growth. This practice embodies the ideals of knowledge sharing, guidance, and support, creating a nurturing environment where mentees can thrive under the guidance of experienced mentors. In this essay, we delve into the significance and transformative power of the mentor-mentee practice within our institution. Fostering Personal Development: The mentor-mentee practice plays a pivotal role in nurturing personal development among students. Mentors serve as role models, offering insights into life experiences and valuable life lessons that extend beyond the classroom. Through open and honest conversations, mentees gain perspectives on setting and achieving personal goals, managing challenges, and making informed decisions. As a result, the mentor-mentee relationship becomes a safe space for mentees to explore their aspirations and fears, leading to increased self-awareness and self-confidence. Academic Excellence through Guidance: Academic excellence is a cornerstone of our institution, and the mentor-mentee practice significantly contributes to this pursuit. Mentors, often faculty members or seasoned students, provide tailored academic guidance that caters to the individual needs of their mentees. They offer insights into effective study techniques, time management skills, and resources that can enhance the learning experience. This personalised approach not only improves academic performance but also cultivates a passion for learning that and networking: are essential for future success. The mentor-mentee practice facilitates opportunities for mentees to learn from professionals in their chosen fields. Mentors can share industry insights, offer career advice, and provide a realistic perspective on various career paths. Furthermore, mentors often become the bridge between mentees and valuable professional connections, creating a network that can open doors t										

personal, academic, and professional trajectories of all involved. Through fostering personal growth, nurturing academic excellence, facilitating professional development, building a supportive community, and honing leadership skills, this practice enriches the educational journey for both mentors and mentees. As our institution continues to uphold and strengthen the mentor-mentee practice,

2.5.2 - Reforms initiated on Continuous Internal Evaluation(CIE) system at the institutional level (250 words)

The institution has embraced a Centralised Continuous Internal Evaluation (CIE) System, known as the Monthly Assessment Test (MAT), as an integral part of the teaching-learning process. This approach ensures a comprehensive evaluation of students development throughout the academic year. To acquaint students with this system, various measures have been taken: • Orientation Programmes: At the start of each semester, orientation programmes are conducted via the colleges public address system. These sessions enlighten students about the evaluation process, while any changes are communicated through Tutorial Meetings and electronic channels. • Notice Board Communication: The college and department notice boards also prominently display the guidelines, keeping students informed about evaluation procedures and updates. • Result Analysis: After each Monthly Assessment Test, the Examination Cell performs a detailed Result Analysis, calculating pass percentages for each course. The Principal oversees students performance and offers constructive feedback to faculty. • Review

Meetings: Department-specific Review Meetings, hosted by the Principal, facilitate performance enhancement discussions based on the Result Analysis, encouraging constant improvement in teaching methods and evaluation strategies. • Parental Involvement: The institution values parental involvement in student progress. Departments send Progress Reports to parents after every test, enabling them to monitor and address their wards academic performance. If necessary, teachers may suggest parents visit the college for personalised discussions. • Remedial Classes: Recognising diverse learning needs, Remedial Classes cater to slow learners, absentees, and active participants in extracurricular activities like sports, NSS, and placement interviews. This approach bridges learning gaps and empowers struggling students. In conclusion, the institutions adoption of the CIE system, especially the MAT, underscores its commitment to comprehensive evaluation. Dissemination of information, meticulous result analysis, parental engagement, and tailored remedial efforts collectively foster a nurturing learning environment, promoting each students holistic growth.

2.5.3 – Academic calendar prepared and adhered for conduct of Examination and other related matters (250 words)

An academic calendar serves as the backbone of an educational institution, providing a structured framework for the smooth conduct of examinations and other essential activities. This calendar acts as a guiding light, ensuring the timely execution of academic processes, maintaining transparency, and fostering an environment of effective communication. This essay delves into the significance of an adhered academic calendar in the context of examination management and related matters. An academic calendar is a meticulously designed schedule that outlines crucial academic events, including examination dates, assignment submission deadlines, registration periods, and holidays. It serves as a roadmap, offering students and faculty a clear overview of the entire academic year. A well-prepared academic calendar facilitates long-term planning, allowing students to manage their studies and commitments effectively. Smooth Conduct of Examinations: Central to the academic calendar is the smooth conduct of examinations. By setting fixed examination dates, students are better equipped to prepare for assessments, reducing last-minute cramming and stress. Faculty members also benefit from the structured timeline, enabling them to design courses, assessments, and study materials in alignment with the calendar. Moreover, adherence to the calendar minimises the likelihood of clashes between different courses examination schedules, providing students with a fair and balanced assessment process. Transparency and Communication: An academic calendar fosters transparency and effective communication between the institution, students, and faculty. By providing important dates well in advance, the institution demonstrates its commitment to fair and organised proceedings. Students can plan their academic commitments, personal activities, and study schedules accordingly. Faculty members can allocate time for teaching, grading, and research without unnecessary overlaps. Resource Allocation and Planning: Adhering to an academic calendar aids in optimal resource allocation and planning. The institution can allocate invigilators, examination halls, and other logistical requirements well in advance. This prevents last-minute rush and ensures that the examinations are conducted seamlessly. Additionally, students can plan their exam preparation strategies, utilising available resources more effectively. The preparation and adherence to an academic calendar for the conduct of examinations and related matters are integral to the effective functioning of an educational institution. It streamlines the examination process, enhances transparency, and fosters efficient communication among all stakeholders. A well-structured academic calendar contributes to a conducive learning environment, allowing students to perform to the best of their abilities while maintaining a balanced academic and personal life. Ultimately, the adherence to the academic calendar is a

testament to the institutions commitment to providing quality education and holistic student development.

2.6 – Student Performance and Learning Outcomes

2.6.1 – Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution (to provide the weblink)

https://diatm.rahul.ac.in/web/igac/

2.6.2 - Pass percentage of students

Programme Code	Programme Name	Programme Specialization	Number of students appeared in the final year examination	Number of students passed in final year examination	Pass Percentage

An educational institutions success is closely intertwined with the efficient management of its physical, academic, and support facilities. The seamless functioning of facilities such as laboratories, libraries, sports complexes, computers, and classrooms is pivotal in creating a conducive learning environment. To ensure the optimal utilization and maintenance of these resources, colleges must establish well-defined procedures and policies that encompass various aspects of facility management. Physical Facilities Management Physical facilities form the backbone of any college. Regular maintenance and timely upgrades are imperative to provide a safe and productive learning environment. A comprehensive policy should outline procedures for routine inspections, repairs, and renovations. Collaborating with maintenance staff and outsourcing specialized services can help address issues promptly. Allocating a portion of the budget specifically for facility upkeep ensures that resources are consistently available for necessary repairs and renovations. Academic Facilities Management The library, laboratories, and										

management should include guidelines for scheduling classes, maintaining equipment, and ensuring cleanliness. Implementing an online reservation system for laboratories and rooms can streamline the booking process. Regular training for laboratory technicians and library staff ensures efficient handling of equipment and resources. Support Facilities Management Support facilities like sports complexes and computer labs contribute to students holistic development. For sports facilities, a policy should encompass equipment maintenance, scheduling of matches and practices, and proper utilization of spaces. In computer labs, guidelines for maintaining hardware and software, as well as cybersecurity protocols, should be in place to safeguard digital resources. Resource Utilization Efficient resource utilization is key to avoiding waste and ensuring equitable access. Colleges should adopt policies to prevent overbooking of facilities and discourage hoarding of resources. Implementing a system to track resource usage and analyzing data can aid in identifying patterns of overuse or underutilization. Security and Access Strict security measures should be outlined in policies to safeguard all facilities. This may include installing surveillance cameras, employing security personnel, and implementing access control systems. Additionally, defining access levels for different categories of users ensures that resources are accessed only by authorized individuals. Environmental Sustainability Modern facility management policies should incorporate sustainability practices. Implementing energyefficient lighting, water-saving fixtures, and waste recycling initiatives contribute to the institutions eco-friendliness. Furthermore, educational campaigns can raise awareness among students and staff about their roles in maintaining a sustainable campus. Emergency Preparedness Unforeseen circumstances like natural disasters or accidents can disrupt facility operations. Colleges should establish procedures for emergency evacuation, medical assistance, and communication during such events. Conducting regular drills ensures that the college community is well-prepared to handle emergencies. Effective management of physical, academic, and support facilities is vital for a colleges success. By developing comprehensive policies and procedures, institutions can create an environment conducive to learning and personal growth. These policies not only ensure optimal utilization of resources but also uphold safety, sustainability, and overall efficiency. Through their commitment to facility management, colleges can create an environment that empowers students and educators alike to thrive.

CRITERION VI – GOVERNANCE, LEADERSHIP AND MANAGEMENT

6.1 – Institutional Vision and Leadership

6.1.1 – Mention two practices of decentralization and participative management during the last year (maximum 500 words)

Decentralization and participative management are crucial practices that empower employees, enhance decision-making, and foster a collaborative environment in an organisation. Implementing these practices can lead to improved efficiency, innovation and overall institutional growth. The two practices of decentralization and participative management are given below: Delegated Decision-Making - Decentralization involves transferring decisionmaking authority from higher levels of management to lower levels. It means granting head of the departments and faculty members the autonomy to make decisions related to curriculum design, student projects, and resource allocation within their respective departments. This approach empowers employees, foster quicker responses to challenges, and promotes a sense of ownership and accountability. Empowered teams can also experiment with new ideas and solutions, fostering a culture for innovation and creativity. Moreover, it demonstrates trust in employees' abilities, boosting their morale and confidence. It also promotes better communication between different levels of the organization. Different units or departments may require different approaches. Delegation allows decisions to be tailored to specific contexts Participative Management - Participative management is an organizational approach that involves employees including faculty and staff members in the decision making process. This approach seeks to harness knowledge, insights, and the creativity of the employees by encouraging their active participation in shaping the organization's goals, strategies, and operations. It fosters a collaborative and inclusive work environment where employees are considered partners in the decision-making process rather than passive recipients of directives from higher management. Participative management encourages the involvement of employees from diverse backgrounds, positions, and skill sets. It recognizes that different perspectives contribute to more well-rounded and informed decisions. Employees are provided with relevant information about the organization's goals, challenges, and performance. This transparency ensures that decisions are based on accurate and complete data. Participative management encourages a culture of continuous improvement by keeping the employees engaged in the ongoing refinement processes, systems, and practices. It also contributes to the creation of a collaborative and open organizational culture where employees feel valued and respected.

6.1.2 – Does the institution have a Management Information System (MIS)?						
	Partial					
6.2 – Strategy Development and Deployment						

6.2.1 - Quality in	provement strategies	adopted by the institu	ution for each of the follow	ring (with in 100 words each):
<u> </u>				U ()

Strategy Type	Details
Curriculum Development	Focus was given to design a dynamic and industry-aligned program. A job- oriented add-on course supplements the core curriculum by focusing on practical skills demanded by industries. Both core engineering principles and emerging technologies were incorporated in the curriculum to

		ensure that the students acquire relevant skills. Such courses enhance employability, giving students a competitive edge in the market. The courses were designed in consultation with industry experts to ensure relevance and alignment with current industry needs.
	Teaching and Learning	To create a dynamic and effective teaching and learning environment, a student-centric approach was employed to accommodate different learning styles and abilities. Interactive teaching methods was adopted to engage students through discussions, group work, and hand-on projects and educational technology tools were utilized to create experiential learning experiences. Integration of real-world case studies and industry projects into the curriculum, bridges the gap between theory and practice. Feedback mechanisms were established so that students can use this input to identify the areas for improvement on courses and teaching methods.
	Examination and Evaluation	The examination system was made to promote comprehensive assessment, fairness, and alignment with learning objectives. A mix of assessment methods such as written exams, practical tests, presentations, and projects were incorporated in the assessment process to measure diverse skills. Standardized well-defined grading rubrics and assessment procedure was made mandatory to maintain consistency and fairness across different evaluators. Uniformity in question paper formats, difficulty levels, and grading standards across different departments of the same course was ensured. Open book examination system was introduced to complement with other assessment method to assess students' problem-solving abilities and practical application of engineering concepts.
	Research and Development	A long term RD roadmap outlining goals, milestones, and resource allocation was devised. To support cutting-edge research, state-of-the-art laboratories, equipment, and technology need to be enhanced. Partnerships with industries were done for collaborative research projects, internships, and technology transfer. Research funding from external government agencies and

	<pre>private organizations is required. Faculty members and students were encouraged to publish their research findings in reputed journals and to present at conferences. Implementation of these strategies helps to foster a vibrant research ecosystem that contributes to technological advancements, societal well-being, and the overall growth of the institution.</pre>
Library, ICT and Physical Infrastructure / Instrumentation	We have diverse collection in our library and are committed to regularly update the library's collection with current and relevant resources, including physical books, e-books, journals, and online databases. We have already invested in a reliable and high- speed network infrastructure to support seamless connectivity across the campus. We planned to implement user- friendly Learning Management Systems and online platforms for course materials, assignments, and communication. We also planned to offer regular training sessions to ensure all users are proficient in using digital tools and platforms effectively. We have a regular maintenance plan and already implemented eco-friendly practices.
Human Resource Management	Human Resource management involves creating an environment that fosters employee development, engagement, and overall organizational success. Keeping this in mind, we implemented regular performance reviews that focus on genuine feedback, development, and goal alignment. We also offer a range of training programs and opportunities for skill enhancement and career growth. We also support ongoing learning through workshops, online courses, and mentorship. We have taken initiatives to offer wellness programs that address physical, mental, and emotional well- being and will be providing resources for stress management, fitness, and mental health support.
Industry Interaction / Collaboration	We have developed partnerships with companies like Mejia Thermal Power Plant, Graphite India Ltd., Matix Fertilisers and Chemicals Ltd. and many more to offer students real-world internships, fostering practical skills and industry exposure. We also invite professionals for guest lectures, workshops, and seminars to share

	<pre>insights and expertise with students and faculty members. We do collaborate on projects that address real industry challenges, allowing students to apply their knowledge in a practical setting. Regular communication with industry partners is also maintained. We regularly update the curriculum to reflect industry needs and technological advancements. We keep connections with our alumni to facilitate industry partnerships, mentorship, and guest speaker opportunities.</pre>
Admission of Students	We maintain an informative and user- friendly website that provides clear information about the admission process, deadlines, and requirements. We give focus on evaluating candidates' core competencies relevant to engineering, such as mathematics, physics, and problem-solving skills. We offer scholarships based on merit to attract a diverse range of talented students. Need- based financial aid programs are also established to ensure access for students from diverse socioeconomic backgrounds. We involve alumni in the admission process, allowing them to interact with and evaluate potential candidates. We also provide training to admission staff to ensure fair, unbiased, and consistent evaluation of applicants.

6.2.2 – Implementation of e-governance in areas of operations:

E-governace area	Details
Planning and Development	By implementing e-governance in planning and development section, we are able to streamline operations, improve communication, enhance transparency, and provide a more efficient and convenient experience for students and faculty members. It improved the service quality as the process became standardized and data- driven. It enables digital storage of records, making it easier to manage student data, faculty profiles, and academic progress. Through this tool, the department can efficiently manage resources and optimize its utilization
Administration	Implementing e-governance in the administration involves using digital technologies to streamline and improve various administrative processes. It enhanced our efficiency, transparency

	<pre>and accessibility in the administrative operations. E-governance also automates manual tasks and processes, reducing paperwork and manual intervention. Automation and digitization also helps us in saving cost. E-governance enables us in efficient storage, retrieval, and analysis of data, leading to informed decision-making. This helps us in making strategic planning and resource allocation.</pre>
Finance and Accounts	We have introduced online fee payment options for students and parents allowing them to pay tuition fees, hostel fees, and other charges through secure online portals. We also have an automated payroll system that ensures accurate salary calculations, tax deductions, and timely payments to employees. We also manage student scholarships through an online platform, simplifying the application, selection and disbursement processes. We have implemented robust data security measures to protect sensitive financial information and ensure privacy.
Student Admission and Support	Centralized entrance examination (WBJEE and JEE Main) and counselling is the practice of student admission for B.Tech courses. Here college follows central admission portal provided by Joint Entrance Examination Board.
Examination	Examinations are subject to the guidelines provided by affiliating university (MAKAUT, WB), college only conducts examination as guided. University portal for examination system are used regarding all (examination, evaluation, uploading of internal marks etc.) related matter

6.3 – Faculty Empowerment Strategies

6.3.1 – Teachers provided with financial support to attend conferences / workshops and towards membership fee of professional bodies during the year

Year	Name of Teacher	Name of conference/ workshop attended for which financial support provided	Name of the professional body for which membership fee is provided	Amount of support
2020	Koushik Mukhopadhyay	FDP on Nanotechnology	NIT Durgapur	1500
2020	Saikat Ghosh	WEES-2020	NIT Durgapur	2000
2020	Saikat Mondal	ICAME-2020	Aliah University, Kolkata	1500

CRITERION VII – INSTITUTIONAL VALUES AND BEST PRACTICES

7.1 – Institutional Values and Social Responsibilities

7.1.1 – Gender Equity (Number of gender equity promotion programmes organized by the institution during the year)

Title of the programme	Period from	Period To	Number of Participants	
			Female	Male
Gender Discrimination- Universal challenge	23/08/2019	23/08/2019	50	74
Challenges of Women in Workplace	23/11/2019	23/11/2019	56	62

7.1.2 - Environmental Consciousness and Sustainability/Alternate Energy initiatives such as:

Percentage of power requirement of the University met by the renewable energy sources

1. Environmental Policy: Institutions must have a well-defined environmental policy that outlines their commitment to sustainability and sets clear objectives and targets. This policy should address various aspects such as waste management, energy conservation, and promoting renewable energy. 2. Energy Audit: Conducting regular energy audits is important to assess the energy consumption patterns within the institution. This helps identify areas where energy conservation measures can be implemented and alternate energy sources can be harnessed. 3. Renewable Energy Sources: Institutions should explore and invest in alternative energy sources such as solar power, wind energy, hydroelectricity, or biomass. Installing solar panels, wind turbines, or small-scale hydroelectric plants can help meet a significant portion of the institutions energy demand. 4. Energy Conservation Measures: Implementing energy conservation measures within the institution can significantly reduce energy consumption. These measures may include retrofitting lighting systems with energy-efficient LED bulbs, using motion sensors to control lighting, optimizing HVAC systems, and promoting awareness among staff and students about energy-saving practices. 5. Waste Management: Institutions should develop robust waste management systems that include recycling, composting, and proper disposal of hazardous waste. Implementing a waste segregation program and conducting regular awareness campaigns can help minimize the environmental impact of waste generated by the institution. 6. Green Infrastructure and Landscaping: Institutions should actively promote green infrastructure and landscaping techniques on their campus. This includes planting native trees and plants, creating green roofs, and using rainwater harvesting techniques to conserve water resources. 7. Research and Innovation: Encouraging research and innovation in the field of renewable energy and sustainability is crucial. Institutions should allocate adequate resources for research projects related

to environmental conservation, renewable energy, and sustainable practices. 8. Curriculum Integration: Institutions should integrate sustainability and environmental consciousness into their academic curriculum. This can be achieved by including relevant courses, conducting workshops, and promoting research on environmental issues among students and faculty. 9. Collaborations and Partnerships: Institutions should collaborate with governmental organizations, NGOs, and industries working in the field of renewable energy and sustainability. This facilitates knowledge sharing, access to funding, and implementation of innovative projects. 10. Monitoring and Evaluation: Regular monitoring and evaluation of environmental initiatives is crucial to assess their effectiveness. Institutions should establish mechanisms to track energy consumption, waste generation, and the impact of sustainability measures. This data can then be used to continua

7.1.3 – Differently abled (Divyangjan) friendliness						
Item facilities	Yes/No	Number of beneficiaries				
Physical facilities	No	Nill				
Provision for lift	No	Nill				
Ramp/Rails	Yes	8

7.1.5 – Human Values and Professiona	al Ethics Code of conduct (handbooks)	o for various stakeholders
Title	Date of publication	Follow up(max 100 words)
A code of conduct handbook for students	15/01/2019	The Student Code of Conduct Handbook is designed to promote a safe and inclusive learning environment for all students, in accordance with university guidelines. It outlines expectations and responsibilities for students, ensuring their actions align with the values of respect, integrity, and academic excellence. Students are expected to be punctual, attend classes regularly, and submit assignments on time. They must demonstrate honesty in all academic work, avoiding plagiarism and cheating. Respectful behavior towards peers, faculty, and staff is imperative, fostering an atmosphere of collaboration and open- mindedness. Any violations of the code may result in disciplinary actions, aimed at maintaining a harmonious academic community.

7.1.6 – Activities conducted for promotion of universal Values and Ethics

Activity	Duration From	Duration To	Number of participants
Independence Day	15/08/2019	15/08/2019	75
Women's day	08/03/2019	08/03/2019	50
Anti tobacco day	31/05/2019	31/05/2019	40
No file uploaded.			

7.1.7 – Initiatives taken by the institution to make the campus eco-friendly (at least five)

Green Campus Policy 1) Ban on use of Plastic: 2) Landscaping with trees and plants: 3) Energy saving: Energy audit to be conducted through a certified agency. 4) Solar power Campus lights 5) Biodiversity in the institute campus.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Title of the Practice: - Innovation in Teaching Learning Method a) For faculty and staff members b) For students 1. Objectives of the practice: The objective of this methodology is to believe in the evolution of teaching and learning methods and what is the best method of reaching out to the students. Response: 1. Institutional best practices, as per the NAAC (National Assessment and Accreditation Council) format, refer to the recommended guidelines and standards that educational institutions should follow to ensure quality and excellence in their operations. These practices cover various aspects of an institutions functioning, including governance, leadership, teaching-learning process, infrastructure, research, and community engagement. 2. Student Support Services: The institution should provide comprehensive support services to students, including academic counseling, career guidance, financial aid, and health services. It should also establish mechanisms to address grievances and promote a conducive learning environm. 3. Project-based learning: Project-based learning is mainly used for self-learning to improve the learning ability of students and to reinforce knowledge received during the lecture. Being a technical institute, this method is extensively used to provide practical evidence of the theory learned. Students are asked to prepare projects with a clear concept of the principles learned. The teacher guides the students at various stages of developing the project, and further gives timely inputs during the preparation of the project work.

Upload details of two best practices successfully implemented by the institution as per NAAC format in your institution website, provide the link

https://diatm.rahul.ac.in/web/best-practices/

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

1. One area where the institution has excelled and set itself apart is in its commitment to promoting environmental sustainability. This vision, priority, and thrust towards sustainability has been apparent in all areas of the institutions operations and has yielded impressive results. 2. From the top-down, the institutions leadership has embraced the importance of environmental sustainability and has integrated it into the institutions strategic plan. This commitment is not merely lip service, but rather a core value that is reflected in the institutions actions and policies. 3. In terms of infrastructure, the institution has made significant investments in energy-efficient technologies and practices. The institution has installed solar panels on its buildings,

implemented energy-efficient lighting systems, and adopted smart building automation systems to reduce energy consumption. These efforts have resulted in a substantial reduction in the institutions carbon footprint, leading to energy savings and cost reductions. 4. The institution has also taken steps to ensure that its operations are environmentally responsible. For example, it has implemented recycling programs throughout its campuses, encouraging students, faculty, and staff to recycle and reduce waste. Additionally, the institution has partnered with local organizations to promote the use of renewable energy sources, such as wind and solar power. 5. Education and awareness are also key components of the institutions sustainability efforts. The institution offers courses and programs focused on sustainability, including environmental science, renewable energy, and sustainable development. It also regularly organizes workshops and seminars on various sustainability topics, bringing in experts from different fields to share their knowledge and experiences. 6. The institutions commitment to sustainability extends beyond its own walls. It actively participates in community engagement initiatives to promote environmental awareness and sustainable practices. For example, it collaborates with local organizations to organize tree-planting campaigns, clean-up drives, and environmental awareness campaigns. By involving the wider community, the institution is able to create a larger impact and influence positive change in the region. 7. The results of the institutions sustainability efforts have been impressive. Not only has it reduced its own environmental impact, but it has also become a leader and role model in promoting sustainability within the education sector. The institution has received numerous awards and recognition for its environmental initiatives, including being ranked as one of the most sustainable institutions in the country. 8. Furthermore, the institutions focus on sustainability has had a positive impact on its reputation and student enrollment. The institution has seen an increase in the number of students who are attracted to its sustainability programs and initiatives. Students are drawn to the institutions commitment to environmental responsibility and want to be part of a community that values sustainability. 9. In conclusion, the institutions performance in the area of environmental sustainability is outstanding and distinctive to its vision, priority, and thrust. Through its infrastructure investments, operational practices, educational programs, and community engagement, the institution has demonstrated its commitment to promoting sustainability. The results speak for themselves, with reduced carbon emissions, cost savings, and a positive impact on the wider community.

Provide the weblink of the institution

https://diatm.rahul.ac.in/web/institutional-distinctiveness/

8. Future Plans of Actions for Next Academic Year

1) To increase the number if ICT rooms and WIFI enabled class rooms 2) To motivate students for MOOCs courses and the faculty members to select the trending subjects and mentor accordingly. 3) Motivate faculty members to attend FDPs including the AICTE approved FDPs under MOOCs. 4) To offer students of all the departments for at least one innovative lab experiment in each semester. 5) To motivate and engage students for social work, work for people belonging to underprivileged sector and to promote for gender equality. 6) To hold collaborative Seminars with the dignitaries from industries to broaden the outlook of the students. Industry and academia collaboration help the students to meet corporate and industry expectations and requirements and prepared themselves accordingly. 7) To develop smart classes for imparting quality education. The audio/visuals displayed through the equipment are intriguing for students and helps build interest, works in sharpening the creative imagination of students. 8) To engage students in different activities as industrial visit, internship etc. 9) More outdoor games for boarders. Playing outdoors allows children to develop self-confidence, physical endurance, independence and self-esteem. 10) To hold more library classes mandatorily, to promote reading habits among students. 11) To incorporate some life skill trainings to empower the students and apply in their day to day life. 12) To arrange regular parent teacher meeting to encourage students to work on themselves, improve their academic performance and widen their skills. 13) To establish Incubation Cell to encourage students for various start up activities. Also giving opportunity to prospective students to bring out innovative ideas through competitions, exploring innovative and creative thoughts. 14) Involve students for more entrepreneurship activities.
